Dosing pump

Grease Eradication system (GES)

Liquid Fat Digester

All kitchen drains are connected to the grease traps (tanks that collect kitchen wastes) by a network of drain lines. Fats, Oils, and grease (F.O.G) generated in the cooking and cleaning process end up in these drain lines and eventually in the grease traps. If not treated this F.O.G. could accumulate in the drain lines causing odors and expensive blockages.

ECO ENVIROMENTAL SERVICES offer unique and comprehensive services for kitchen drain line Maintenance and reduces odor problems commonly found in commercial establishments. Our systems are state-of-the-art fully automatic cost-effective, environmentally conscious and designed to inject a powerful Bacteria into the drain line.

What are the top benefits of GES cleaning.

- Eliminate the Causes of Noxious and Toxic Odors and Corrosion
- Facilitate Grease Trap Maintenance
- Reduce Use of Toxic Chemicals
- Protect the Municipality Sewer

Grease Trap

Grease Trap Cleaning

Cleaning and servicing a grease trap is an unpleasant task for kitchen staff to perform. The odor from a grease trap is overpowering and off putting to staff and customers. Staff may also not clean it completely and thoroughly which will impair the grease trap's performance, leading to blocked drains. Eco Environmental Services will clear your kitchen grease traps thoroughly and efficiently every time. All of our grease trap professionals are fully trained in the most advanced grease trap cleaning and grease disposal processes. This means you can rely on our grease trap cleaners to dispose of your waste grease in a safe and environmentally-friendly way.

Benefits

- Keep Up with municipality Regulations
- It Prevents Buildup of cumulation
- Helps the Environment
- Ensure A Healthy Work Environment
- Ensures You Stay Open for Business
- Keep the sewage lines clean

Cleaning Equipment

Kitchen Extraction Cleaning

Over time, even the best type of extraction system will have an accumulation of grease, dirt and ash in the ducts, hoods, and fan. These can cause an environmental health hazard as they can harbor dangerous bacteria, foul odor and not to forget a fire hazard. Therefore, it is very essential that the kitchen extract and ventilation systems are cleaned regularly to ensure a healthy and safe environment.

At Eco Environment Services our trained technicians specialize in

cleaning and degreasing of Kitchen extraction systems to comply with environmental

health regulations and fire insurance specifications

Benefits

We Keep Your Business Open

We Help Reduce the Risk of Fire

We Help Promote Cleaner Indoor Air

Lift Station Cleaning

We specialize in manually and mechanically cleaning accumulations in lift stations. Our cleaning staff are trained in the aspects of safety such as working in confined spaces, basic firefighting, basic first aid, etc. ensuring that all works are carried out in strict accordance with the safety of the client's property and of the staff.

Benefits

Solid materials can often plug or damage pump impellers to remove the solid material from the lift station.

Regular wet well cleaning can help ensure longer plant uptime reduce maintenance costs and less chance of plant failure through blockages and pump failure.

Pressure clean and degrease wet well interior; clean and degrease each float switch.

Perform complete station pump down.

Secure (lock) wet well, control panel, switch disconnect and valve box.

Cleaning Equipment

Laundry Duct Cleaning

Found in commercial laundries which can be a part of a hotel complex or a factory. Of all air handling systems, laundries are the most fire hazardous. This is because they pick up lint and fluff via the large driers. A simple regular cleaning program will eliminate this problem. Not only will the system be cleaned but you will be kept informed of any problems that may be occurring in the system so that they can be addressed before any costly repairs or loss of time.

Benefits

Save Tons of Time

Increase the Life of Your Clothing

Extend the Life of Your Dryer

Save Energy

Get Rid of Allergens

Carbon Monoxide Poisoning Prevention

Fire Safety and Dryer Vents

Disinfection Against Covid-19

ECO has been in the specialised cleaning sanitisation and hygiene services for the last 15 years. Since the outbreak of the COVID-19 disease in Dubai, ECO is in the forefront of disinfection against COVID-19. ECO is approved by Dubai Municipality to provide disinfection services Against Covid-19. Using Dubai municipality approved bio safe disinfection and the most appropriate personal protective equipment we carry out disinfection of all type of facilities. Our hygiene technicians are very experienced and well trained in all aspects of disinfection, particularly against COVID-19. They are fully backed up and supported by a team of chemical engineers, microbiologists, safety professionals, project managers and services technicians. Our experience and professionalism is unmatched. ECO provides both preventive and post quarantine disinfection against COVID-19 . We have different methods for preventive and post quarantine disinfection. Usually cold jet fogging is done for preventive disinfection. ECO can mobilise at short notice and are equipped to disinfect facilities of any size. ECO works to well documented method and statement and after carrying out a risk assessment.
